

Guide to setting up Citrix on a home computer/laptop

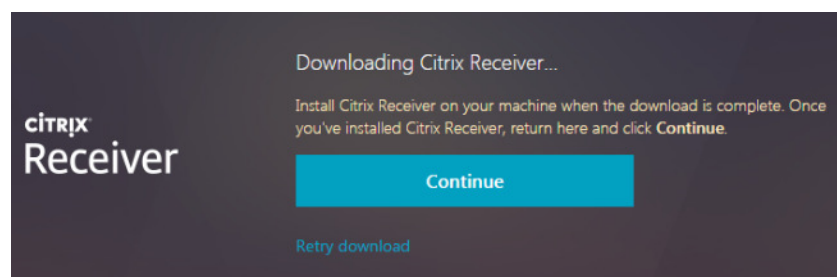

1. Browse to <https://myDesktop.furness.ac.uk>

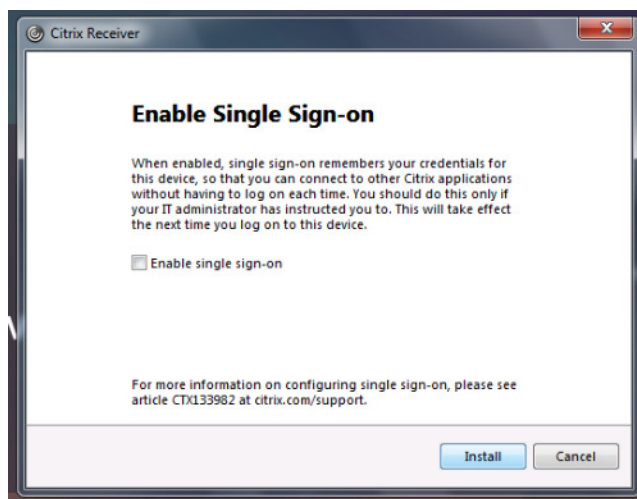

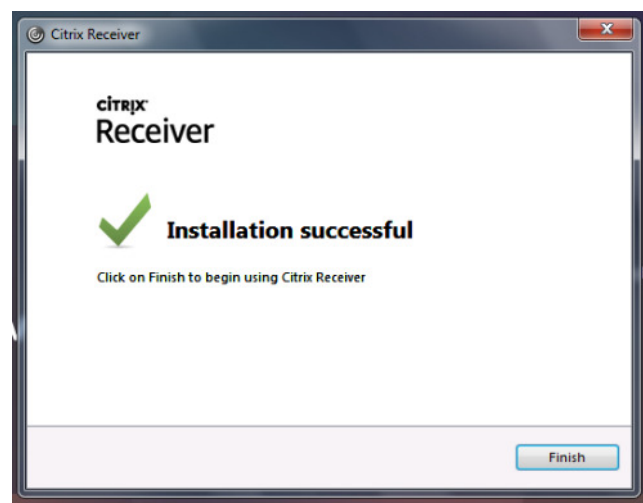

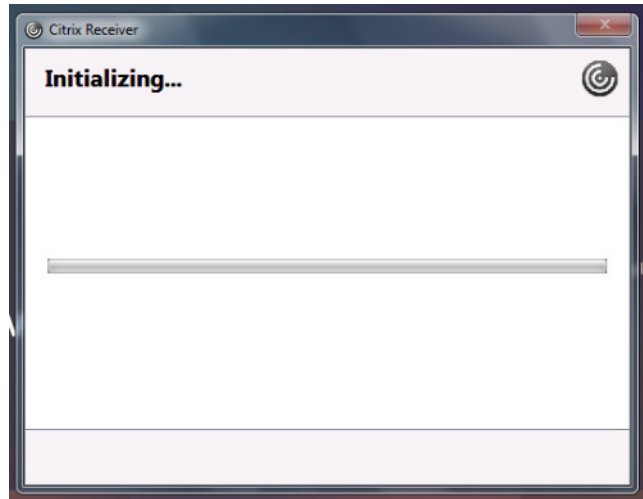

2. Enter your username and password
3. You may be prompted to detect the Citrix software

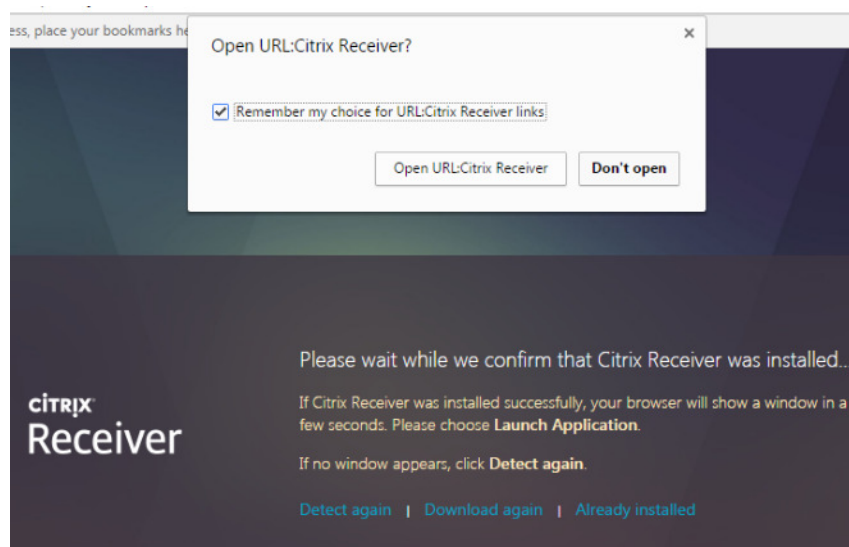

4. If not already installed download and install the Citrix Receiver software

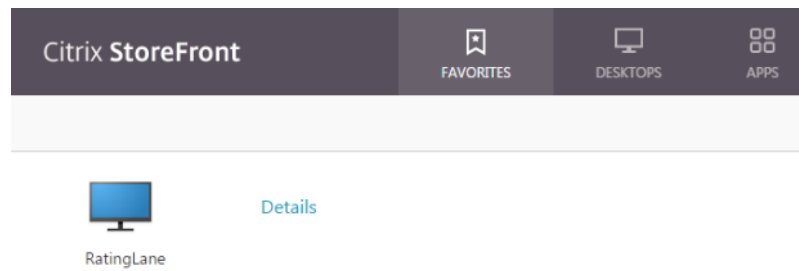

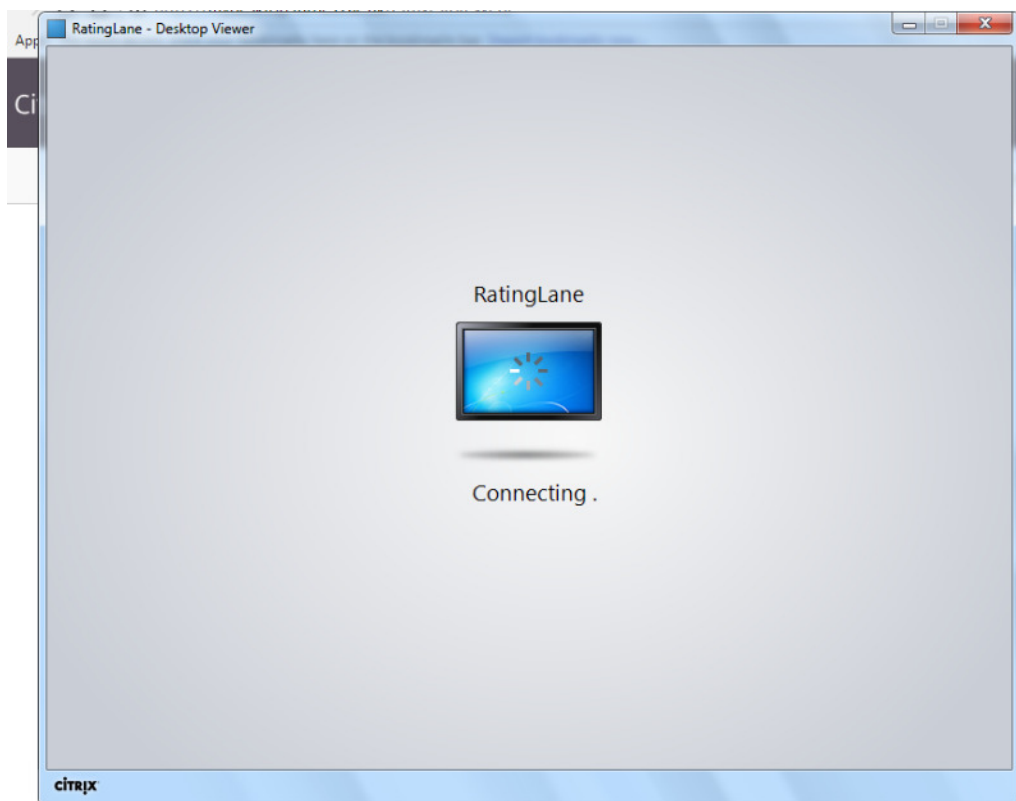

5. Once installed the browser may ask you to allow the Citrix receiver, allow it and continue.

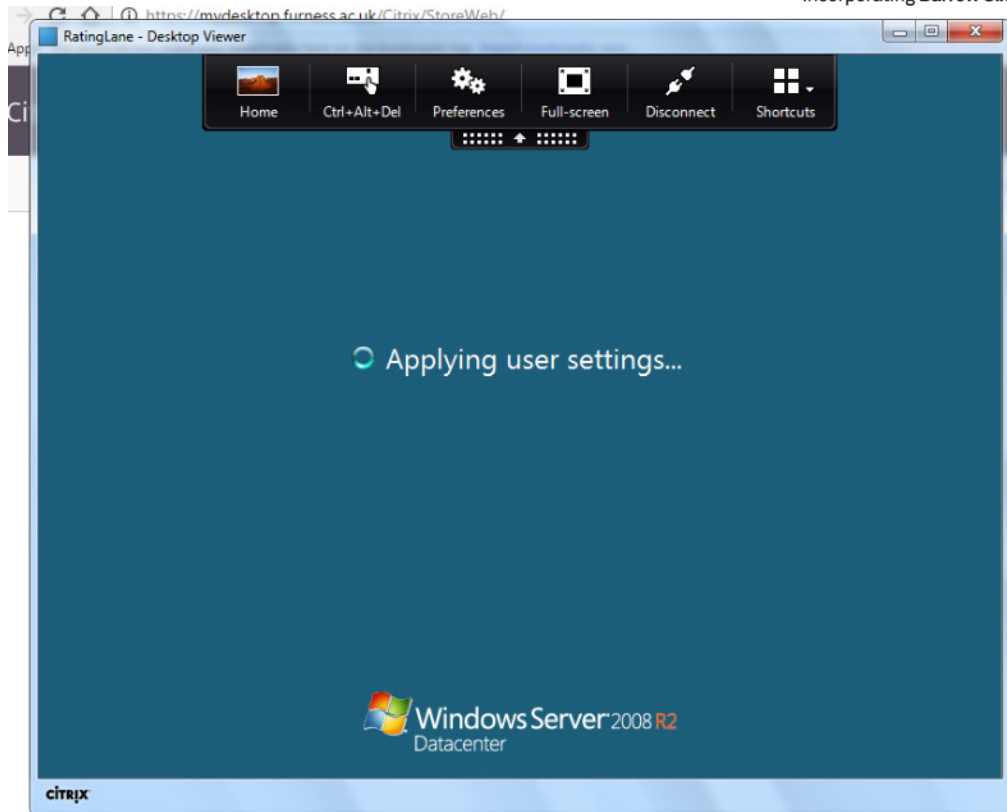

6. You are now at the resources page for Furness College Citrix. If you don't have anything in your favourites click on Desktops and choose the appropriate desktop you require. This will usually be the only one available.

7. Once clicked on it will launch a separate window which is your Citrix Session.

8. The black toolbar at the top allows you to switch between your Citrix session and your computer/laptop.

9. You can now use the College network resources as if you are sitting in College, with access to software and network shares.
